

# BOWHUNTZ™

BOW, WINGSHOOTING, & FISHING ADVENTURES

*FOR BOWHUNTERS  
BY BOWHUNTERS™*

**Bowhuntz** is owned by myself & my wife Mia Sloan. We **SPECIALIZE** in assisting bow hunters in finding, selecting, and arranging their dream archery hunt.

**Bowhuntz** is here today because over the last 19 years as a guide and outfitter I've listened to story after story of hunters that have booked an Elk hunt, a trip to New Zealand, or an African Safari only to come home with no animals or animals they were forced to hunt with a rifle because the bowhunting opportunities were non-existent.

The single most important thing a hunter needs to understand is that there is a day and night difference between an outfitter that "offers" bow hunting and an outfitter that specializes in bow hunting.

*We are here to make sure when you book the bow hunt of your dreams that is exactly what you get.*

I started bowhunting when I was 8 years old and spent my youth bowhunting West Texas and the Rocky Mountains. Some of the hunts were self guided, others were outfitted, and the rest were following my Dad around the Mountains learning from him.

At the age of 18 I began my professional hunting career as an apprentice PH (professional hunter) at a well known bow hunting only company in South Africa. I spent the next 5 years guiding and learning from some of the best in Africa but I always had ambitions of starting my own company. In 2004 I started **Chorongas Safaris** which specializes in bow hunting safaris in Southern Africa for Plains and Dangerous game.

Over the last 15 years I have developed countless relationships with some of the best bow hunting operators in our industry around the world. This network of bow hunting clients, guides, and outfitters has uniquely placed us here at **Bowhuntz** in the best position possible to link you and your bow hunting dreams.

**Evan Sloan**

# PHYSICAL REQUIREMENTS

These hunts are usually farm/ranch/estate hunts and most hunting is done from blinds or tree stands. Most wingshooting and fishing trips fall into this category as well as African plains game hunts and whitetail deer.

Hunts are usually on private ranches and may include walking and stalking plains game in Africa, Caribou, as well as other species in hilly terrain.

Moderate physical hunts such as walk and stalk mule deer, elk, and other animals in semi-mountainous terrain.

Wilderness hunts including horseback hunting in the mountains fall into this category. Bad weather conditions may also play a role in the physicality. Dangerous game such as Cape Buffalo and Elephant also fall into the number 4 category.

These are your extreme mountain, alpine, and cold weather hunts and only the most athletic and physically fit hunters should attempt these trips.

Be sure to join our newsletter and keep tabs on our website as **new outfitters and trips will be added monthly** as I have the chance to go and visit the outfitters and see their operations first hand.

At this time we have more African destinations than any other for one simple reason. **I'VE BEEN GUIDING AND OUTFITTING IN AFRICA FOR THE LAST 19 YEARS. I HAVE INTIMATE KNOWLEDGE OF THE OUTFITTERS AND HUNTING AREAS** so naturally these are the first areas we've brought into our stable of outfitters.

New regions will be added as we visit and approve outfitters from those regions. This is a long process but we don't want to rush it as this could compromise your future bow hunts.
